

Northern Cardinal

Cardinalis cardinalis

With their beautiful red *plumage*, Cardinals are easy to recognize.

The northern cardinal's strong, thick bill is perfect for large seeds. Sunflower seeds and safflower seeds are two of their favorites!

These foods should be offered in large, wide feeders that provide plenty of space for these birds to

perch. Platform feeders and large hopper feeders are good choices.

Northern cardinals readily visit bird baths for bathing and drinking.

Plumage: feathers on a bird
